

## Why Fitzpatrick Mfg?

We have a comprehensive quality system that assures you of quality parts every time

At Fitzpatrick Mfg., all jobs go through a first piece, in-process, and final inspection. Our state-of-the-art inspection room allows multiple inspections, which speeds throughput and delivery times.

Our employees have continuous classroom training in instrument reading, machine operation and safety, threading, blueprint reading and work cell procedures. Our shop employees must also attend weekly quality control meetings. The result of all this training is a disciplined work force that consistently produces quality parts.

Fitzpatrick Mfg. has been registered to the ISO 9002 Standard since 1994.

### Coordinate Measuring Machine

Faster and more accurate multiple part inspections *increase confidence and produce a better product.*

### Classroom

All classes are solution-based and are derived directly from real-life problems in the shop. *This real life approach has a positive impact on quality and service.*

### Inspection Room

Our large, well equipped inspection room allows our inspectors to do their job accurately and efficiently, *speeding throughput and assuring part integrity.*
